Express Internet Access

This router complies with worldwide ADSL standards. It supports downstream rates of up to 12/24 Mbps with ADSL2/2+, 8 Mbps with ADSL, and upstream rates of up to 1 Mbps. With this technology, users enjoy not only high-speed ADSL service but also broadband multimedia applications such as interactive gaming, video streaming and real-time audio much more quickly and easily than ever. In particular, by doubling the upstream data rate, the Annex M standard included in the BiPAC 5200GA model supports the latest ADSL2/2+ for higher upload speeds.

Wireless Mobility

With an integrated 802.11g Wireless Access Point, the router offers quick and easy access and mobility to the users of wired networks, wireless networks, and broadband connections (ADSL). In addition to supporting the 54 Mbps 802.11g data rate, it is also backward compatible with existing 802.11b equipment. The Wireless Protected Access (WPA-PSK/WPA2-PSK) and Wireless Encryption Protocol (WEP) features enhance the level of data protection and access control via a Wireless LAN.

SOHO Firewall Security

Along with the built-in NAT natural firewall feature, the router's advanced anti-hacker pattern-filtering protection feature automatically detects and blocks Denial of Service (DoS) attacks. In addition to the NAT technology, the BiPAC 5200G supports Packet Filtering for high-level security control.

Easy Network Management

The Web-based User Interface makes the BiPAC 5200G extremely easy for users to install and manage the network. The router supports DHCP client and server, enabling system administrators to easily fit this security router into existing network environment and manage the IP assignment without re-configuring other stations. Furthermore, future firmware upgrade can be downloaded via the user-friendly Web-based Interface.
